Anatomy

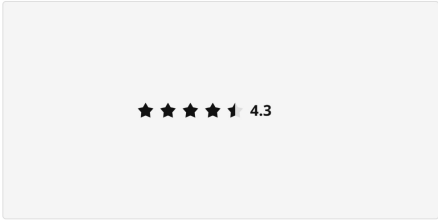

Variants

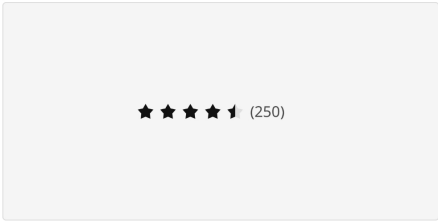

Stars with rating and quantity

Suitable when you only wish to present a simple presentation of rating, but not promote the collection of more ratings or wish to promote it in some other way in the UI.

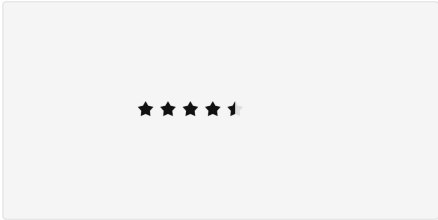

Stars with rating

Quantity count toggled off. Suitable when you only wish to present a simple presentation of the rating value.

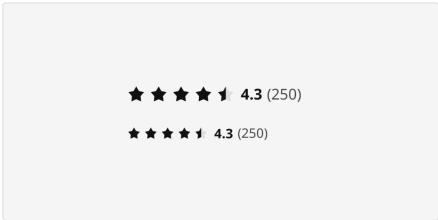

Stars with quantity

Textual rating toggled off. Suitable when you only wish to present a simple presentation of ratings and the quantity.

Stars

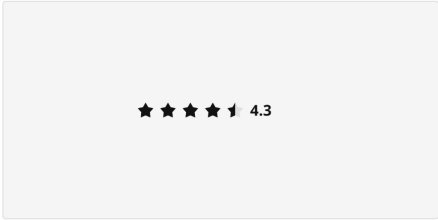

Textual rating and review count toggled off. Suitable when you only wish to present a simple presentation of ratings.

Sizes

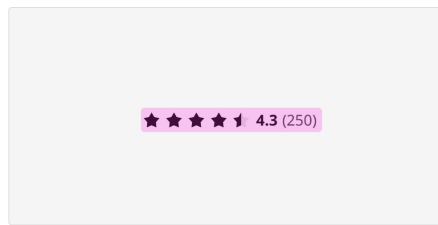

Rating is available in sizes Medium and Small.

Behaviours

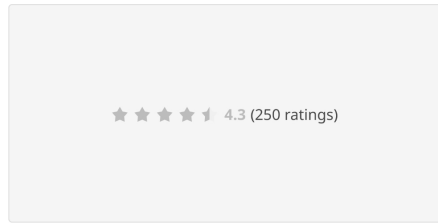

Rating value rounding

When presenting values, round up to the nearest first decimal for text-based values (such as 4.26 into 4.3). Match the visual rating for the value to the closest provided option by an 0.5 increment. In other words, 4.3 would be visually converted to the star presentation of 4.5 instead of 4.

Clickable element

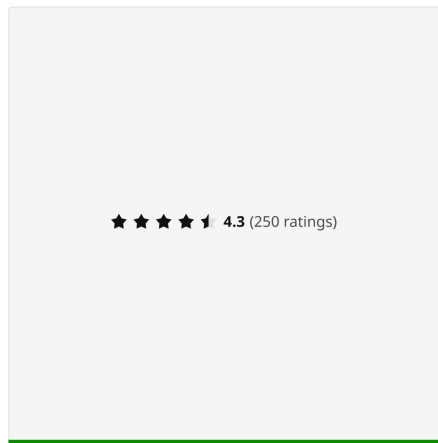

In the Rating component you can have the Rating content as a clickable element, such as to be used as an anchor-link to another place on the page.

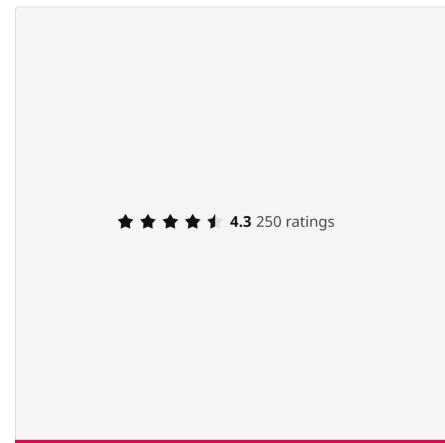

Label for rating quantity

If you wish, you can add a label next to the rating quantity value. In fact, if you have the space it requires, it is preferable to add it for increased clarity. The label next to the rating quantity value has been reduced in the main component in order to keep the component compact. Keep in mind that the brackets wrapping the rating quantity label is part of the component.

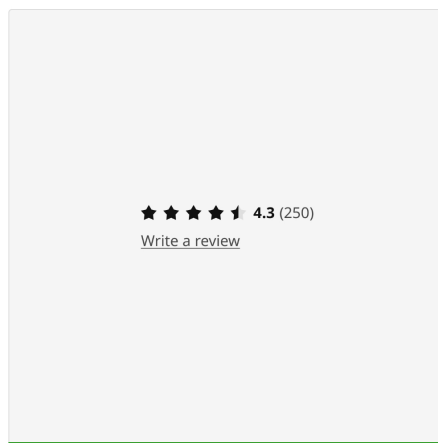

Usage

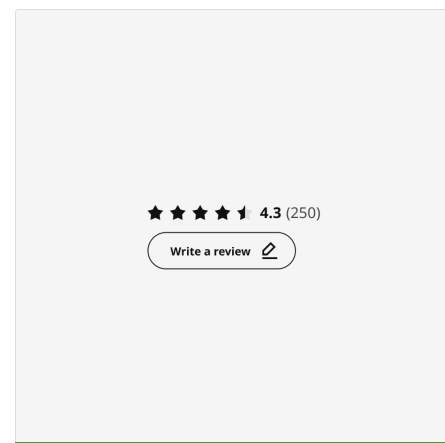

✓ You may add a label next to the quantity value.

✗ Don't remove the brackets around the label.

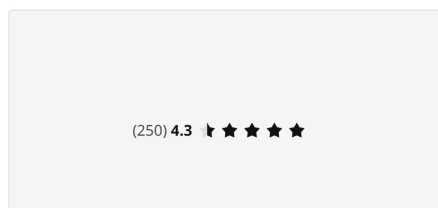

✓ You may complement Rating with a separate Hyperlink as CTA.

✓ You may complement Rating with a separate Button as CTA.

Internationalisation

RTL languages

The elements within the Rating component flips horizontally for RTL languages.

Accessibility

The component has been validated for accessibility against WCAG 2.2 on May 21'st 2025.

Notes

- Even though the color of inactive stars may not have enough contrast to validate from a color contrast standpoint, these counts as disabled decoration and hence counts as an exemption to these rules. Having them use a more prominent color would also reduce the contrast ratio to the active stars. We do however recommend to display the textual rating value as well to reinforce the clarification.

Keyboard interactions

Key	Description
Tab	If used, focus on the next action.
Shift + Tab	If used, focus on the previous action.
Space / Enter	Triggers action.
